

To Future Fourth Grade PACE Math Students -

I'm looking forward to having you in my math class next school year. Over the summer, be sure that you memorize the math multiplication facts through twelve, and division facts within 100. When you first come to class, please bring a 1-inch binder with lined paper and at least one divider, as well as a folder for homework. Also be sure you bring a pencil to each class.

For extra practice and math games, please check out my Portaportal site: www.portaportal.com (guest name = mcataldo). Once on the site, on the left side are two student sections: Student Math Resources and Strategy Puzzles/Logic Games. You'll find lots of cool games in either section.

You can also check out my webpage. To get there, go to the EDMES website, and click on the Staff tab. Find my name on the right half of the page, and click on "webpage".

If you have any questions for me, you can e-mail me at my school e-mail (mcataldo@sau10.org). Have a great summer!

Ms. Cataldo
